IS SPECIALIST | WEB DEVELOPER | UI/UX DESIGNER

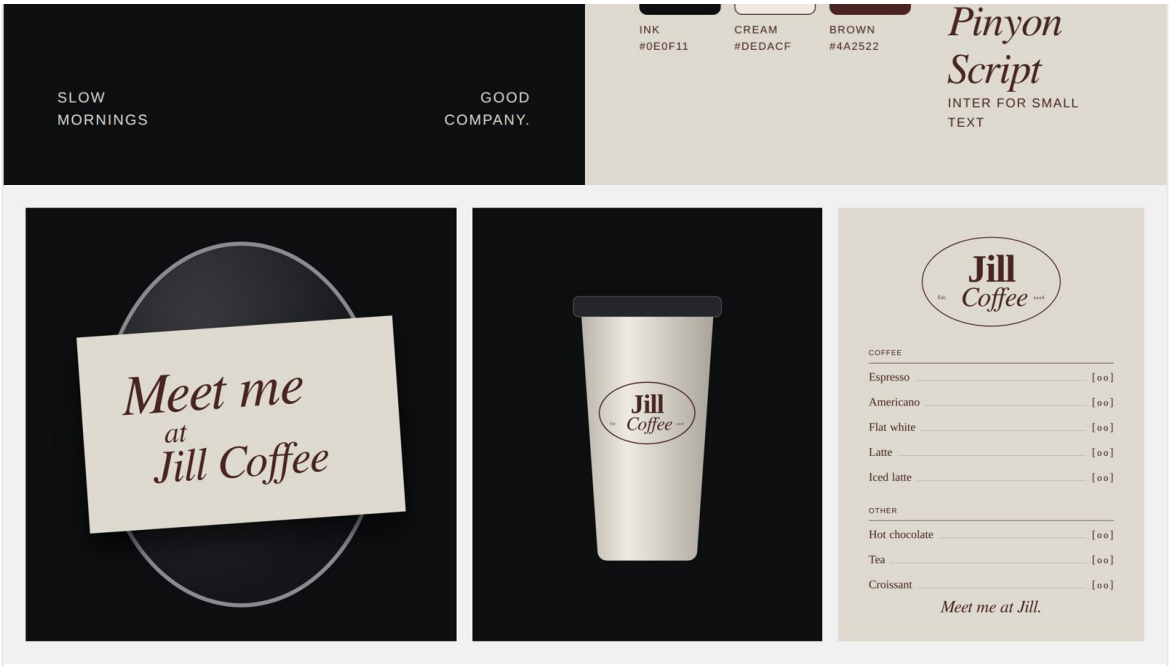

Abrar Fahad Almutairi

I design app interfaces and build web pages. Here are my graduation project at Qassim University, a plant care app, a brand identity, and a college support website.

Projects

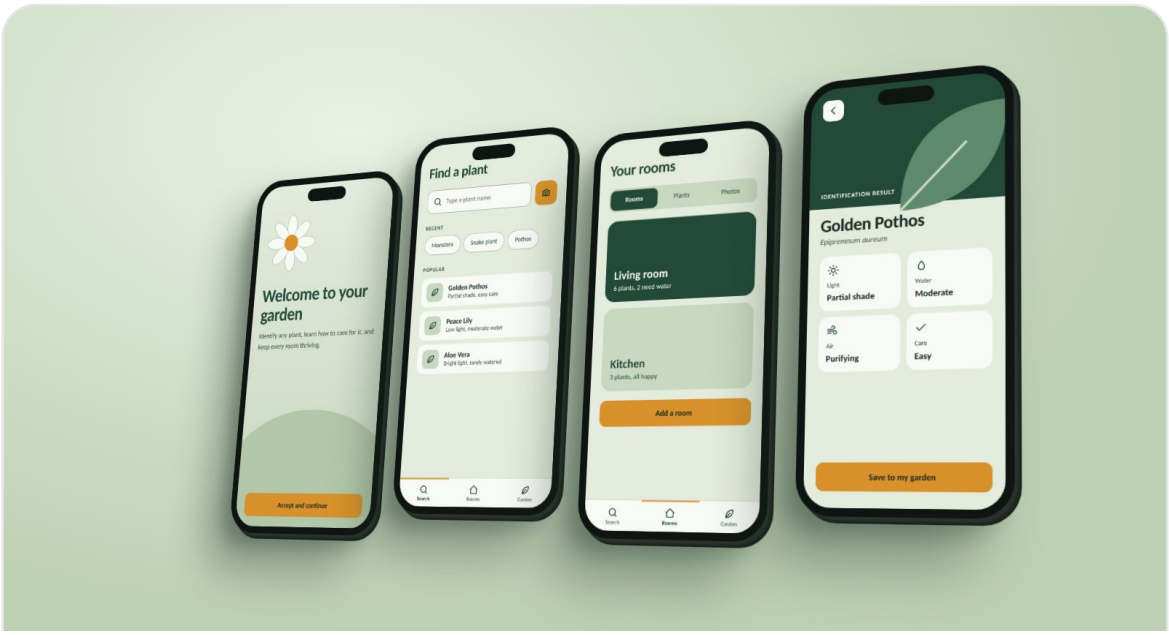

Jill Coffee Brand Identity

Branding | Visual identity

A visual identity for Jill, a modern coffee shop. The logo is an oval badge that pairs a classic serif with a handwritten script, in a black, cream and deep brown palette. I applied it to a brand board, a paper cup, a menu and a social media post.

Logo badge Colour palette Typography Cup, menu, social

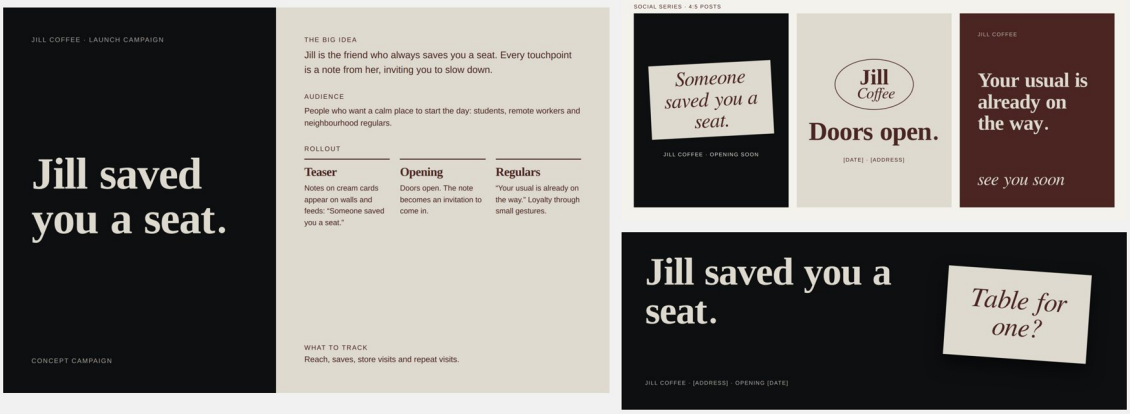

Plant Care App Redesign

UI design | Mobile

A second version of the four Plant Care screens: welcome, plant search by name or camera, browsing by room, and identification results. I kept the sage palette and amber button, and focused on clarity: one pair of fonts, stronger contrast, larger touch targets and one clear action per screen.

UI design Mobile Sage and amber

Jill Coffee Launch Campaign

Marketing campaign | Concept project

A concept launch campaign for the Jill brand, built on one idea: Jill saved you a seat. Every piece is a short note from Jill that invites people to slow down, from the first teaser to the regulars who come back every day.

Campaign concept Social series Outdoor

SmartProjectManager

Graduation project | Team of 8 | Qassim University

A system where managers send projects to employees, employees submit their work, and AI helps evaluate it. I built the submission and evaluation buttons, styled them, and added the manager control panel. Projects were reaching the wrong employees because of serial IDs, so I replaced them with UUIDs and an employeeId field.

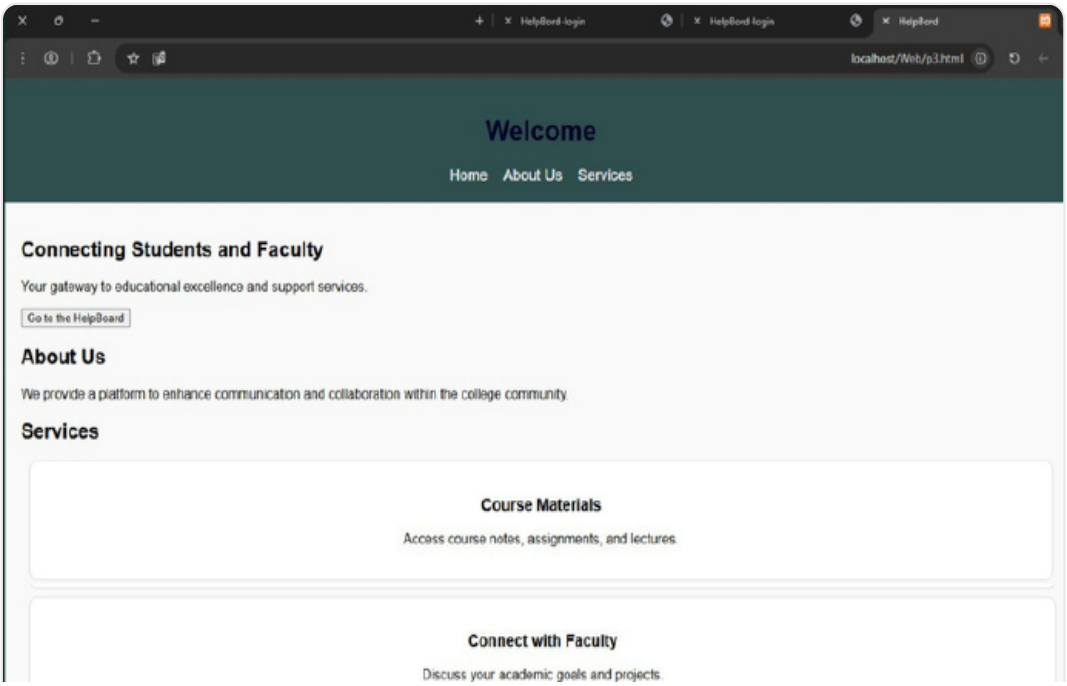

HTML CSS Django UUID AI integration

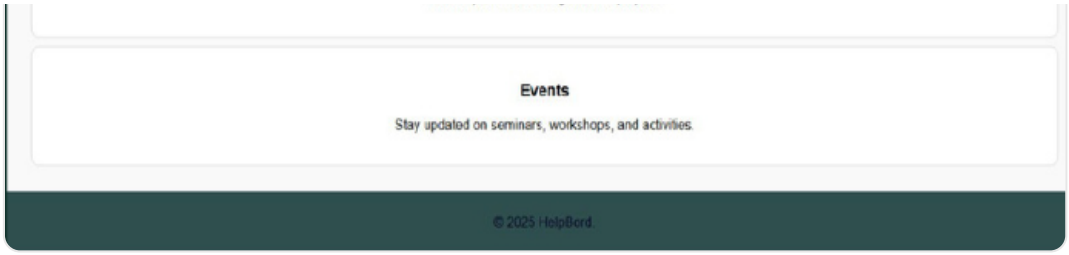

Plant Care Campaign Poster

Marketing design | Concept poster (practice project)

An advertising poster for the Plant Care app, built with the same sage and amber palette as the app. One clear message, three key features, and a download button.

Poster Marketing design

HelpBord

Web development | Course project

A landing page for a platform connecting students and faculty. It has a header with navigation, an about section, and three service cards: Course Materials, Connect with Faculty and Events.

HTML5 CSS3 Semantic markup
